OUR LEADERS' OPINIONS ABOUT...

Our President and our Minister of Oil share their thoughts on the state of the global economy, oil prices, and Yemen's laws

Poverty sometimes is a blessing in disguise. Yemen does not have to worry about anything because we do not have sovereign funds to invest abroad and all our wealth is inside the country. The kind of wealth that does not make us loses our sleep or gives us a headache. We are secure and the global economic meltdown does not affect us.

Recently discovered gas, which we will soon export, will generate income for Yemen. We have been consulting experts on the oil reserve to calculate the level of benefit in addition to the promising gas projects so that we can increase our expenditure on development projects. There are 30 oil exploration

OUR MINISTER OF OIL & MINERALS

companies currently working in Yemen which have guaranteed the existence of large oil reserves although the size is yet to be ascertained.

Our Leader is serious in developing oil investment laws

which are three-pronged: One for oil, one for gas and the third for oil and gas together. We shall develop the existing laws and make them more suitable at a time when the world is facing financial crisis and our leader believe this crisis has a positive side because investors will want

Oil is Yemen's primary source of revenue and major export.

to invest in a country which is safe for investments.

MINISTER of OIL & MINERALS is an expert. He is looking forward to increasing Yemen's oil and gas production, rocketing the country's economy into the ranks of the world's financial leaders.

Oil is vital to our development and our current production is around 280,000 bbl. /d provides the main source of income. Yemen contains oil in place of 10.9 billion barrels and had produced 2.7 Billion

barrels in 2011.

With natural gas reserves of 18.2 trillion cubic feet, Yemen has considerable potential as a natural gas producer and exporter. The bulk of Yemen's gas reserves are concentrated in the Marib-Jawf fields.

The MOM continued to give more attention to exploration for additional reserves by offering more attractive contract terms to international oil companies. As a result 60 new PSAs have been signed and ratified during the

years 1997 until mid-2004 plus many MOUs with other companies.

Finally, the MOM conferred the International Oil Companies (I.O.C.s.) an opportunity to become a significant producer of oil and gas for the worldwide market, since most of Yemen yet to be explored and still much room for more exploration.

Extra Petroleum: Company Profile

Extra Petroleum, a company incorporated under the Laws of Yemen carrying the company number of 21/5134 & TAX MASTER LICENSE number: 155539 Registered with Ministry of Manufacturing & Commerce, and registered with PEPA (Petroleum Exploration Production Authority), located in hadda Street at Sana'a, Republic of Yemen.

Our goal is to bring together the whole business community under one roof to make their corporate plane most profitable with the fuel of abundant opportunities and field of infinite growth.

Extra Petroleum has a vision to not only make relations but

to also develop those by becoming a path among the Exploration, drilling, production, facilitation companies in Oil and Gas as communities of the world to develop their business and invest in the republic of Yemen.

We can help Yemen contribute to the global economy. Our goal is to open new horizons for business opportunities so that Oil and Gas companies can expand their businesses in the republic of Yemen. We, as «Extra Petroleum» are dedicated to provide a win-win situation for these petroleum companies through knowledge of EXIM.

Whatever your business is, we can facilitate and

boost that optimally, offering you amazingly huge profits & sources, well-rounded business development, and miraculous economic progress. Opportunities are infinite; once you discover what and how much wonder we can create for you!

Extra Petroleum is considered one of the leading companies that are under supervision of the Yemen General Organization for Petroleum and Gas which falls under the Ministry of Oil and Minerals. Extra Petroleum specializes in marketing blocks, drilling project and more directly from PEPA without a doubt, the company contributes in the economic cycle domestically by means of the strategies put down by the

leadership of the Ministry of Oil and Minerals, a ship that is being navigated by His Excellency the Minister of Oil and Minerals. His Excellency is working on developing this gigantic economic platform and supporting its arrival to his foreseen destination.

Here is a high level overview of what Extra Petroleum of Yemen has to offer.

The fast growing future for business community demands the bridge that brings close Petroleum companies and investors from all over the world to participate with the government of Yemen. Extra Petroleum has built itself with the vision to create the dynamic platform for them to have a strong alchemic relationship.

OUR VISION

A vibrant upstream petroleum industry in republic of Yemen

OUR MISSION

To promote, facilitate and regulate exploration and sustainable development of oil and gas in republic of Yemen.

OUR STRATEGY

- Our strategy is to exceed our client's expectations, in respect to quality, timing and pricing.
- Good management is KEY to the success of any project.
- Extra petroleum believes in building an open relationship where mutual respect and trust allow the project to develop and come to fruition through technical and commercial commitment.

OUR COMMITMENT

EXTRA PETROLEUM aspires to be a world class organisation, committed to:

EXCELLENCE

- Excellent service to our clients.
- Keeping up to date with latest developments.
- Treating each other with the same respect and professionalism as we treat our clients.
- Adherence to confidentiality agreements.
- Full compliance with all appropriate industry regulations and standards.

INTEGRITY

- Being congruent in what we say and what we do.
- Being honest and truthful.
- Being consistent and equitable in applying policies and practices.
- Being accountable and accepting responsibility.
- Continually questioning ourselves whether our behaviour is in line with the company's values.

COMMUNICATION

- Addressing issues openly, direct and in good time.
- Being approachable and open to constructive feedback.
- Relevant involvement of staff members when decisions are made.
- Constructively making colleagues aware of their behaviour that clash with the values.

TRANSPARENCY

- Communicating the processes through which decisions were reached on all staff-related issues.
- Declaring external interests, gifts and relationships to address conflicts of interest.
- Communicating and making available all updated policies and procedures to all staff members.
- Continuing to make information such as license application procedures accessible to all prospective clients/interest parties

RESPECT

- Acknowledging and greeting one another.
- Treating each other with human dignity.
- Valuing diversity (e.g. cultural, religious and gender diversity)
- Respect for company resources and company time.

TEAMWORK

- Keeping staff members informed.
- Consulting staff members in decision-making.
- Developing the knowledge and skills of staff members.
- Valuing the roles and responsibilities of staff members.
- Acknowledging contributions made.
- Actively assisting and supporting one another.

OUR SERVICES

Fulfilling every need of the Oil and Gas Industry

Extra Petroleum is a service provider to the Oil and Gas Industry. We provide trained, experienced personnel, safety training which meets US Standards for all trades, accommodations and food services. We have direct access many different professions, including:

Contractor Services and supplies such as Pipeline Construction, Down hole Services, Road Construction, Civil Construction, SAGD Construction, LNG Production Facilities, Drill Pipe, Pipe and Fittings, Valves, Tanks, Well Head Supplies, pumps, Safety Equipment, Welding

Administration services, Transportation, catering, security, personal logistics, warehousing, hotel and travel arrangements with recruitment, rental cars, and more.

Our goal is to bring together **the whole business community** under one umbrella to make their corporate plane the most profitable.

AN INVESTMENT COMPANY

Build with us, Grow with us, Succeed with us.

An investment company invests the money it receives from investors on a collective basis, and each investor shares in the profits and losses in proportion to the investor's interest in the investment company. The performance of the investment company will be based on (but it won't be identical to) the performance of the securi-

ties and other assets that the investment company owns

Extra Petroleum looking for investors that play a crucial role throughout the value chain of enterprise creation, from the earliest stages of intellectual property development to mid and later-stage. Through selected financial, we need

an investors that offer small and medium sized enterprises a wide range of financing solutions.

There are banks and promotional banks, leasing companies, guarantee funds, mutual guarantee institutions, venture capital and private equity funds, micro-finance institutions and microcredit providers or

What is an Investment Company?

Generally, an «investment company» is a company (corporation, business trust, partnership, or limited liability company) that issues securities and is primarily engaged in the business of investing in securities.

any other financial institution providing financing or guarantees believe that informed investors make better investment decisions and that is why one of our core company values is a focus on education.

We, Extra Petroleum need investors with a number of award-winning educational tools to help them learn more about the markets they invest in.

This is why every project Extra Petroleum selects is very beneficial to investors. We need boutique investment advisors specializing in emerging markets and natural resources. Investors' portfolio managers

must travel the earth researching opportunities and evaluating risks, all in the pursuit of exceptional performance for our projects and their success. Extra Petroleum is

here to work side by side with investors who have direct access to sources such as private and government project owners.

DISTRIBUTION & PARTNERS

Extra Petroleum leading integrated oilfield supply and services providers to the global oil & gas, marine and petrochemical industries.

Extra Petroleum» brings strong business acumen to the management team. In our career, we have gained a full knowledge and understanding of all facets of distribution operations and management. Extra Petroleum has demonstrated leadership in creating and managing an effective and efficient team and partners like IPP Texas Houston, Aqua-Terra, KS and so on..

We have a proven ability to manage all financial components of the business in a manner that enhances profitability while meeting customer service expectations with 100% performance. Our goal is to be the industry

AQUA-TERRA

leader of distribution for oilfield supply in the republic of Yemen..

Extra Petroleum is an official leading one-stop energy services provider to the global oil and gas («O&G»), marine and petrochemical industries. «Extra Petroleum» is diverse and service-oriented team that has proven abilities to provide customers with superior service and technical capabilities. People are our most valued asset and are recognized and encouraged for their innovation, contribution and accountability.

Today Extra Petroleum became the main distribution of parts components, capital equipment charter and provision of drilling and rig management services. Its distribution arm – Our Distribution

represents more than 300 globally-accredited brands and distributes more than 60,000 line items. Today Extra Petroleum operates as a distributor of industrial and oilfield products and services to oil and gas producers, mining, forestry, and these industries associated contractors and service companies conducting business throughout North America, Europe and Far East Asia

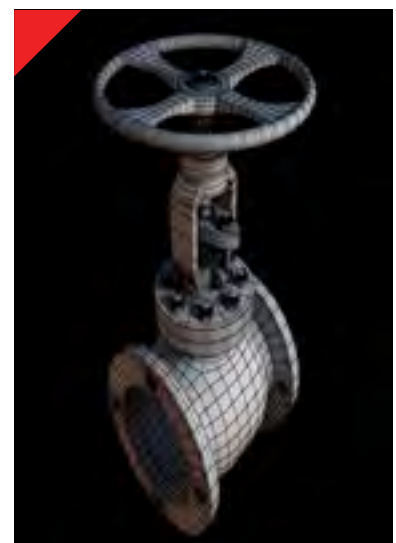

Extra Petroleum supplies all products to the energy industry.

Ball Valve, Gate Valve, Globe Valve, Check Valve & Butterfly Valve Strainer

All Installation Products, Hydraulic & Industrial hoses, Industrial & Offshore Hoses, Anchor, Anchor Chains & Components, Butt Weld Fittings, Carbon Steel Seamless Pipes, Carbon Steel and Stainless Steel Flanges, Butt Weld Fittings, Carbon Steel Seamless Pipes, Thread compound, Offshore Safety Equipment, Welding Consumables, OEM Oilfield Equipment Parts, Mechanized Welding & Cutting Systems, Special Wire Rope, Carbon

Steel Seamless Pipes, Wire Rope Lubricants, Contitech Couplings, High Pressure Drilling & Production Hoses, Rigging Equipment & Accessories, Cargo Securing Systems, Plate Roll Machine, Hot Roll Plate, Hose Fitting & Accessories, Synthetic Mooring Ropes, Hot Roll Plate, Structural Profiles, Industrial Tools, Pipe Cutting Machines & Alignment Clamps, Carbon Steel Seamless Pipes, H-Beam, CNC machine, Carbon Steel Welded Pipes, Hot Roll Plate, Pipe Clamps, Cranes, Replacement Parts, Carbon Steel Seamless Pipes, Rotary, Vibrator, Jumper & Drilling Hoses, Engine

Distributors and Partners

IPP Group Manufacture and export stainless steel and our range includes 15 NB to 100 NB in 3000 LBS, 6000 LBS, 9000 LBS available with NACE MR 01-75 . High quality forged fittings & outlets in different sizes and specifications with wide range. .

IPP Group have earned a strong reputation in the market for our quality forged fitting. Developed keeping to the requirements of their customers and exacting market standards, our

products are known for their high performance, durability and variety of designs and specifications. "IPP Group" can manufacture fittings as per drawings. For more info please see material Grades Forged fittings 15 NB To 100 NB In 3000 LBS, 6000 LBS, 9000 LBS available with NACE MR 01-75 in Stainless

Steel, Duplex Steel, Monel, Inconel, Hastelloy, Titanium, Nickel Alloy, ETC OUTLET'S ½» TO 24» in 3000 LBS, 6000 LBS, 9000 LBS available with NACE MR 01-75.

ABO valve was founded in 1993 as a joint venture between a Czech company Siwatec, a. s. and a French entity Buracco SA as Armatury Buracco Olomouc – i.e. ABO. With a history of almost 20 years, we are currently one of the largest European manufacturers of shut-off and control valves for industrial applications. ABO valve produce butterfly valves for general and industrial applications including double and triple offset, knife gate and safety valves for the most demanding conditions.

Alfagomma's exploring leading edge technology, developing innovative products and expanding around the world. These are the principles on which Alfagomma's success has been built. Continuous investment and top-flight research team constantly reinforce Alfagomma's leadership position with the design and development of technologically advanced products. All products undergo thorough testing both in company laboratories and in Institutes authorised to issue quality certificates.

This no-nonsense approach has led to ISO 9001 certification, clear testimony to the Group's quality first policy.

Butt-welding fittings are fundamental to piping and fundamental to BENKAN JAPAN KK as well. These foundational components support various infrastructures behind the scene, having an ever-important role in the past, present, and coming century. We at BENKAN JAPAN KK, with many years of experience and expertise, utilize original cutting-edge manufacturing technologies to our advantage in providing quality products that support the basic needs of life.

Benteler is proud of its more than 130-year history of success as a company, managed as a family business – now in its fourth generation. Profitable growth and a progressive tradition are decisive for Benteler in continuing to ensure its entrepreneurial autonomy in the future as well. The Benteler Group currently employs around 29,400 people at 170 sites in 38 countries. Products: Carbon Steel Seamless Pipes

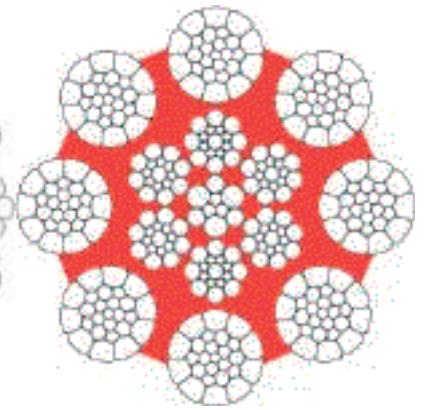

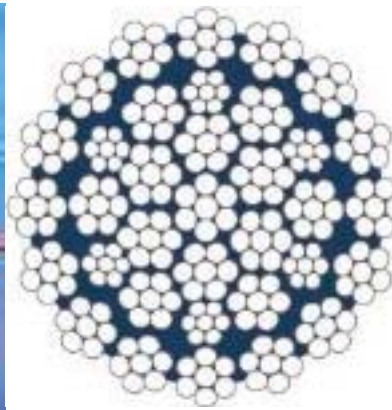

Bestolife Corporation prides itself on serving the petroleum industry as the premiere thread compound manu-

facturer, producing the finest quality products for every situation. Bestolife produce products to meet the needs of drilling, production, and industrial applications, along with a host of miscellaneous support products. Bestolife revolutionized the drilling industry with our first compound, 'Bestolife 270®' the first thread compound to combat galling, seizing and downhole makeup. Bestolife has continued innovating, with products formulated to meet any criteria from environmental concerns, high or low temperature, and extreme exposure to the elements, high pressure and more.

Billy Pugh Co.'s mission is the manufacture of a full line of premium quality safety equipment. With close to 50 years of commitment to quality we continue to "over-build" our safety equipment. All our products exceed the minimum standards set by USCG, OSHA, CE and ANSI. At Billy Pugh Co. we will even work closely with you to customize an existing product or develop a new one for your specific application.

Bug-O Systems, A Division of the Weld Tooling Corporation, is a Family Owned business that started with the invention of the single Livesay Multipurpose Machine in 1943 to help automate the cutting and welding process in the manufacturing of Landing Craft for World War II. Since that time the company has grown and evolved to become a Global Leader in the design, manufacturing and application of several lines of portable automation products for the cutting and welding industry, from small projects to cross country pipelines around the world

CHENGDU DERBO STEEL CO., LTD

CASAR proprietary and innovative German-engineered rope designs deliver the highest levels of performance and safety, superior breaking strength values, the highest bending fatigue resistance, superior crushing resistance, and the best rotational resistance characteristics for high lifts. We have decades of global experience and on-site engineering support in the crane, OEM and underground mining sectors. CASAR has an extensive range of products available and we can customize to your application. Our wire rope specialists will assist customers in design; selection, installation and operation to improve rope performance and maximize service life engineered.

M/S Chengdu Derbo focus on steel industry and more specifically, we are the expert on below mentioned products: carbon steel&alloy steel seamless pipes/tubes,welded steel pipes/tubes,stainless steel pipes/tubes, elbows,reducers,flanges,bends,etc for oil&gas industry,ship building ,pressure vessel like oilers,superheaters,heat exchangers,petroleum cracking , auto industry,engineering industry,etc. Value added services based on basic products are available here in M/S Chengdu Derbo like galvanization,external coating&internal lining, machining,etc

The Crosby Group was conceived with a long range goal to develop into a single source for accessories used in the lifting and material handling industry with the highest levels of quality control available. Through a creative program of product development and aggressive acquisitions of market-leading lines, Crosby began its growth. The current experience level of our employees has been many years in the making.

ContiTech AG is the world's largest specialist for rubber and plastics technology in the non-tire rubber sector. A division of Continental AG, the company develops and produces functional parts, components and systems for the automotive and other important industries.

Enerpac provides the largest selection of cylinders and lifting systems, fully supported and available through the most extensive network of distributors worldwide. We have a solution for virtually any application – lifting, pushing, pulling, bending or holding – in most industrial and commercial work environments. Enerpac offers hundreds of different configurations of mechanical and hydraulic cylinders and lifting systems, plus products ranging from hydraulic jacks and lifting bags, for portability and tight fits, to engineered systems for precise control over multiple lift points

Enarpac provides the largest selection of cylinders and lifting systems, fully supported and available through the most extensive network of distributors worldwide. We have a solution for virtually any application – lifting, pushing, pulling, bending or holding – in most industrial and commercial work environments. Enerpac offers hundreds of different configurations of mechanical and hydraulic cylinders and lifting systems, plus products ranging from hydraulic jacks and lifting bags, for portability and tight fits, to engineered systems for precise control over multiple lift points

Zhejiang Fangzheng Valve Manufacturing Co.,Ltd (FZV) was founded in 1983. We are a national high-tech enterprise and a member of the Chinese Valve Association. FZV has always been dedicated to technological innovation and has been successively honored by the Innovation Funds and Technology Achievement Awards from the Ministry of Science and Technology (China). FZV requires all our equipments to be the latest technological equipments of the highest qualities and standards. Having the latest equipments and having a good maintenance/servicing schedule will enable all our equipments to deliver optimum results and performances.

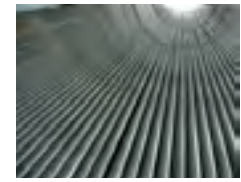

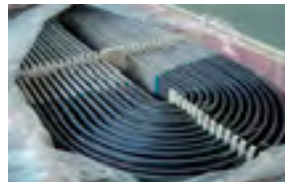

Over the years H & M has developed a complete line of pipe-related products, being used on major pipeline and construction projects worldwide. Determined to be the leader, H & M continues to set precision, quality and portability standards in all its machines, tools and accessories. H & M continually raises the pipe cutting and beveling machine industry's standard of quality by creating excellent products.

For more than 160 years, ITT has been a global leader in supplying the oil and gas industry with durable and reliable products and services engineered to withstand the harshest operational environments.

Successful exploration and production depends on safe, reliable equipment. ITT offers extensive, innovative products and services that meet the demanding requirements of offshore platforms, exploration, floating production, storage and off-loading facilities – and optimize the life cycle of customer equipment.

Jiuli, as a leading manufacturer of stainless steel pipes and tubes, has been providing superior piping and tubing solutions for their numerous customers in various industries during the past 20 years. With substantial investments and ongoing innovation, They now offer a more complete line of products, a wider range of sizes, and more material grades, including Nickel Alloys, Super Duplex and Titanium. Consistent with the more demanding products, Jiuli operates comprehensive testing facilities, with a matching quality management system to satisfy our customer's expectations

Kerotest produce American-made valves that are among the best you can buy anywhere in the world. As an employee-owned TQM company, Kerotest don't just talk about quality, they produce it. That's why everyone here is empowered to give you the best product, the best value, and the best service. It's the American way...and it's our way.

In a new multi-million dollar facility, we have combined good old American know-how with state-of-the-art technology. Tried and true craftsman will run computerized, numerically controlled systems of incredible precision and speed. The result is a machining and manufacturing center that enables us to increase capacity, reduce production variations, and accelerate order turnaround time.

The companies offer products and technologies for thermal cutting, joining and altering of materials. This includes primarily equipment and filler materials for welding and plasma cutting technique.

The mobile and self-driven Kjellberg automat KA 1-UP can be used for single wire welding of plane sheets and inner tubes. The submerged-arc welding automat is available in three versions: for a maximum wire diameter of 3 mm, 5 mm and as steerable version. The latter is especially designed for fillet and butt welds on conic components like windmill towers. Pipe inside welding is possible with a diameter of 1500 mm or more.

Tenaris is a leading supplier of tubes and related services for the world's energy industry and certain other industrial applications. Our mission is to deliver value to our customers through product development, manufacturing excellence, and supply chain management. Tenaris employees around the world are committed to continuous improvement by sharing knowledge across a single global organization.

Tenaris provides line pipe for onshore applications, developed for severe working environments. Their products meet the oil industry's needs for onshore transportation and are ideal for use in extreme conditions such as corrosive environments, low and high temperatures, high pressure and sour service

Tenaris offers a comprehensive range of products and services that meet oil and gas companies' offshore deep and ultra-deep water needs. We have a strong industrial system, state-of-the-art R&D facilities and years of industry experience in metallurgy and the development of customized steel pipes, especially for risers.

Tenaris delivers a wide range of seamless and welded tubes for onshore line pipe to be used in the most demanding conditions. Products are manufactured in accordance to particular project specifications and national or international standards. In alliance with a group of worldwide coaters, Tenaris offers comprehensive coatings solutions for oil and gas pipelines and other tubular applications. In addition to our extensive line pipe distributors' network, we offer a full range of direct project management services for all stages of well operations, including Inventory Handling, Field Services, Consultancy, Technical and Post-Installation Services.

Weir Oil & Gas Division designs and manufactures pumps and ancillary equipment for the global upstream and downstream oil and gas markets and provides aftermarket service and support activities

Weir SPM's Pump Monitoring Device (PMD) was developed to allow the user to continually monitor the status of their well service pumps with real time data in an easy to read format. The PMD allows the operator to make the necessary changes during operation to minimize or prevent costly damage to pumping equipment and increase longevity of their pumps.

On a loud and hectic frac site, many problems are not always evident until it is too late and damage has been done. Through various sensors installed on the pump, the PMD provides a unique opportunity to diagnose problems such as insufficient charge pressure, discharge and suction valve failure, cavitation, as well as other issues by displaying «alarms» to notify the user of any problems as they occur.

BAND-IT®

Founded in Denver, Colorado in 1937, BAND-IT is acknowledged as the world's leader in quality engineered band clamping and fastening solutions. BAND-IT, a unit of IDEX Corporation, has a global network of sales and manufacturing facilities serving users worldwide.

BAND-IT Scru-Seal Kit uses a rack and pinion system allowing the user to make a clamp in any size. Kit offers complete flexibility for use in almost any application. Form clamps of any diameter from continuous roll of band and tension using only a screwdriver.

The exclusive design of the Tri-Lokt® Hose Nipple is the answer for heavy duty industrial hose applications. The Tri-Lokt® Hose Nipple should be used when a positive lock is required between the clamp and the nipple. The locking yoke or tie strip assembly together with the BAND-IT® clamp accommodates the various wall thicknesses of different types of hoses.

Energy is one of the most powerful forms in the world. Throughout history, energy has played a huge role in human civilization. But since source of energy are limited while the human demand on energy usage is increasing from time to time, an energy service company is established in order to manage and give solutions to restore the energy usage while trying to meet human growing demands.

A product of extensive research, Rust Combat™ rust remover is an environmentally-safe water-based product that removes rust in minutes, without scrubbing. It's so easy to use, anyone can restore their rusted tools, auto parts, even firearms to like-new condition. One gallon de-rusts up to 300 lbs. of steel.

- Removes even heavy rust completely
- Non-toxic, non-corrosive, safe on skin
- No fumes or bad odors, non-flammable, no VOC's
- Biodegradable, water soluble
- Easy to use - Soak part in room temperature solution
- Requires no special equipment
- No acids, bases, solvents or other toxic ingredients
- Will not harm unrusted steel, safe on other metals
- Can be disposed of safely into sewer
- One gallon derusts up to 300 pounds of heavily rusted steel
- Will not affect plastic, PVC, Viton and most paint

Rust Combat works through selective chelation. This is a process in which a large synthetic molecule forms a bond with metals and holds them in solution. Most chelating agents bind many different metals. The active ingredient in Rust Combat bonds to iron exclusively. It can remove iron from iron oxide but is too weak to remove iron from steel where the iron is held much more strongly. Once the chelating agent has removed the iron, a sulfur bearing organic molecule pulls the iron away from the chelator and forms a ferric sulfate complex which remains water soluble. This frees the chelating agent to remove more iron from rust.

No Blaze + after 80,000 km

Using Blaze+ after 80,000 km

CPU/SeMAR PETROLEUM TECH

Smart Chemical Modifier for enhanced Oil Recovery

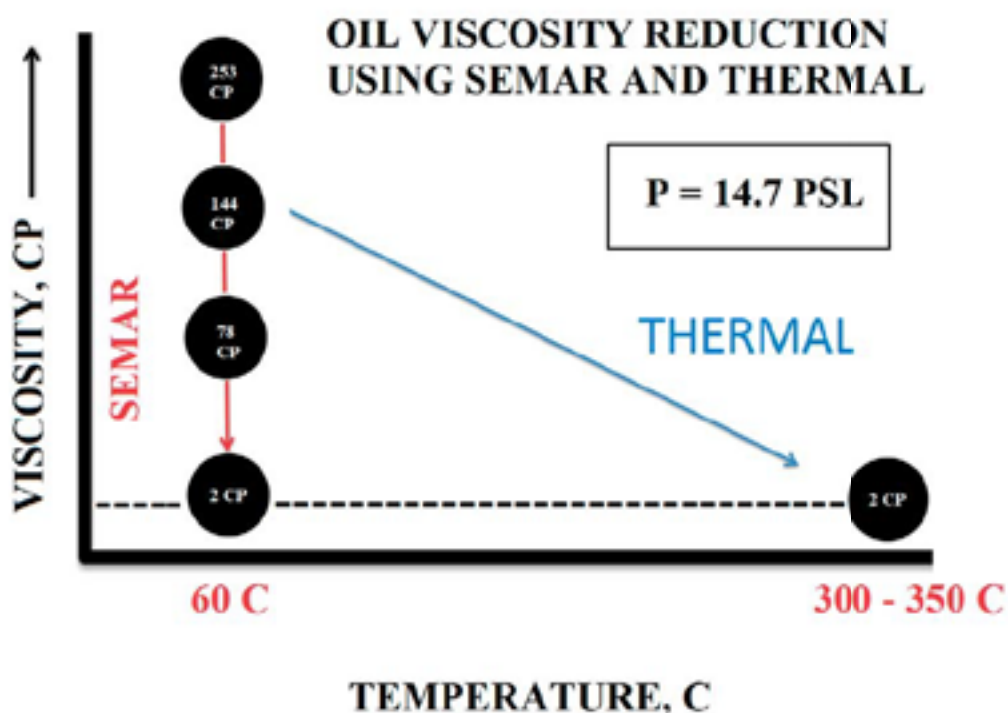

CPU/ (Solution by Chemical Modifier to Enhance Recovery) are a special chemical modified to accelerate recovery of oil fields. On a low concentration in a system, CPU has the ability to imbibe and alter the amount of energy on the surface or interfacial layers of the system. This Petroleum technology will help increasing the production of oil. With CPU - SeMAR Petroleum technology we can reduce the water cut to increase the oil production or whatever the number of percentage can reducing the water cut is depend on result of analysis sample of water, oil & core at CPU - SeMAR Technology lab in Indonesia.

CPU - SeMAR Petroleum technology can lift the light oil to oil from onshore or offshore block, it is a type of oil which very difficult to be lifted, which until today there is no single company in the world can do just by using our simple technic of our Chemical Injection into the wells and it will do the job. Our technology can accept esisting water from the well, river water, or sea water.

CPU - SeMAR would like to introduce and share our Petroleum technology to Operator companies or blocks owners, only if they are experiencing declining Oil block production. Using our proven technology with records documented and with lowest cost,

Using our tailor made chemical for any type of crude from:

Light Crude, Consisting Tight Sand, Tight Resinic, Tight Carbonate, Up To Heavy Crude.
